

VANITY PLEATED COLOURS

Uni-Blinds®

Innovation comes built-in

ADD A SPLASH OF COLOUR

Style and practicality in perfect balance

Make your home uniquely yours with Uni-Blinds® pleated integral blinds. With twelve colours to choose from, it is a blind that allows you to tailor the look you are seeking with absolute ease.

Stylish Uni-Blinds® pleated integral blinds are manufactured from woven polyester fabric in a wide range of colour options so they're able to perfectly complement any interior design or décor.

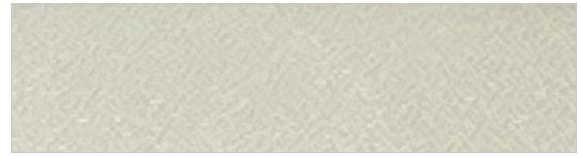

The high quality fabric allows a soft diffusion of light, making the pleated blinds an attractive, elegant blind solution with a number of practical benefits. Being permanently enclosed in between the panes of glass in a double or triple glazed unit within windows, bi-fold doors and conservatories, they require no cleaning or maintenance. It is a design that ensures the blinds stay in pristine condition for years to come, and they are also suitable for rooms with higher levels of condensation or water, such as bathrooms and kitchens.
